Information

The lightweight plastic shells are available in nine standard colors and made of high-impact polyethylene (PE-HD). They are also resistant to chemical influences. Color and shape of a trolley are therefore retained even under extreme loads and meet even the toughest industry-specific standards. So a trolley remains a versatile, reliable transportation partner with full maneuverability and precise handling. Depending on the version, our trolleys also meet special civil and military packaging standards, such as the ATA 300 (Category I).

As a so-called system container, the box also has a stackability with other system containers of different sizes due to the special arrangement of a grid of stacking pins in the lid.

Measurements

Interior (l x w x h (base + lid)) [mm]:
1150 x 350 x 200 (120 + 80)

Exterior (l x w x h (base + lid)) [mm]:
1215 x 400 x 260 (155 + 105)

Colors

RAL: similar to
9011, black

RAL: similar to
6014, army green

RAL: similar to
9010, white

RAL: similar to
9007, silver grey
