## Information

The lightweight plastic shells are available in nine standard colors and made of high-impact polyethylene (PE-HD). They are also resistant to chemical influences. Color and shape are therefore retained even under extreme loads and they meet even the toughest industry-specific standards. With its handy dimensions, the case offers the cargo perfect protection with full mobility. Depending on the version, a case also meets special civil and military packaging standards, such as the ATA 300 (Category I),.

As a so-called system container, the box also has a stackability with other system containers of different sizes due to the special arrangement of a grid of stacking pins in the lid.

## Measurements

Interior (l x w x h (base + lid)) [mm]:  
560 x 365 x 210 (140 + 70)

Exterior (l x w x h (base + lid)) [mm]:  
615 x 420 x 235 (155 + 80)

Weight 4,7 kg
