Information

The lightweight plastic shells are available in nine standard colors and made of high-impact polyethylene (PE-HD). They are also resistant to chemical influences. Color and shape are therefore retained even under extreme loads and they meet even the toughest industry-specific standards. With its handy dimensions, the case offers the cargo perfect protection with full mobility. Depending on the version, a case also meets special civil and military packaging standards, such as the ATA 300 (Category I),.

As a so-called system container, the box also has a stackability with other system containers of different sizes due to the special arrangement of a grid of stacking pins in the lid.

Measurements

Interior (l x w x h (base + lid)) [mm]:
610 x 480 x 250 (155 + 95)

Exterior (l x w x h (base + lid)) [mm]:
660 x 525 x 265 (160 + 105)

Weight 5,5 kg
